INTRODUCTION

SuperCode had succeeded to put together a panel of top tier highly specialized and professional associates, known as leaders in their fields of specialty, capable of carrying the required activities and tasks at the highest professional and satisfactory levels.

Our panel of highly qualified and experienced consultants/associates has a very well known record in their respective disciplines in Palestine and abroad with long years

Our UI/UX will design the screens and pages using the advanced Adobe XD, using multi-screen size/type approach, thus, the designs will be initiated by phone size design, then it will be reflected into wide screens (tablets screens), this will assure that the application will be readable and accessible by the smallest available screens, so it can be easily readable and accessible by the larger size ones

VISION

To become a prime performer in the palestinian marketplace by providing highly innovative web designing, web development and internet marketing services that will drive our clients' business towards growth. Worldwide reputation is the dream of every company and we want to achieve it through our work.

MISSION

To become a prime performer in the palestinian market-place by providing highly innovative web designing, web development and internet marketing services that will drive our clients' business towards growth. Worldwide reputation is the dream of every company and we want to achieve it through our work.

all companies now they want to development apps and websites ,now we can biulding it and we have many apps in palestinian market (restaurants , Services sector , electronic stores , booking salons , booking clinic and doctors and others ...

MOBILE APP TECHNOLOGIES

we using native mobile app is a smartphone application that is coded in a specific programming language, such as Objective C for iOS or Java for Android operating systems. Native mobile apps provide fast performance and a high degree of reliability. They also have access to a phone's various devices, such as its camera and address book. In addition, users can use some apps without an internet connection.

WEB TECHNOLOGIES

The development team use the php development language through the Laravel framework, thus, the Laravel is a web application framework with expressive, elegant syntax. Laravel is a free, open-source PHP
